

CPA Evolution Disciplines

How to choose your section

In January 2024, CPA Evolution will take effect and the CPA Exam will structurally change. New CPA candidates will need to select one new Discipline section and take the three Core sections required by all CPA candidates: AUD, FAR and REG. You should view this as an opportunity to try out a specialization without having to commit serious time to it.

Select a discipline based on your strengths and which one interests you the most. Keep in mind, you will be able to work in any area regardless of which discipline you choose.
